**Restriction:**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5 and 58-61, drawn to method of modifying, updating a protocol stack, classified in class 717, subclasses 172 and 173.
- II. Claims 6-17, 46-51 and 52-57, drawn to use of communication protocol stack in a mobile device, classified in class 709, subclasses 230, 250.
- III. Claims 18-45, drawn to method of transferring and installation of software components, classified in class 717, subclass 178 and class 719, subclass 329.
- IV. Claims 62-68, drawn to a specific protocol stack configuration, classified in class 719, subclass 321.

The inventions are distinct, each from the other because of the following reasons: Inventions I through IV are related as combination and subcombinations. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP 806.05(c)). In the instant case, the combination II as claimed do not require the particulars of the subcombinations I, III and IV as

Art Unit: 2154

claimed because a conventional protocol stack can be used in the invention II. The subcombination I has separate utility such as updating and modifying the protocol stack at run-time. The subcombination III has separate utility such as downloading and installation of software components via network. The subcombination IV has separate utility such as use of multiple protocol stacks in a communication application.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Viet Vu whose telephone number is 571-272-3977. The examiner can normally be reached on Monday through Thursday from 8:00am to 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Follansbee, can be reached on 571-272-3964.
